Final Amdt. dated August 17, 2006

Reply to Final Office Action dated May 17, 2006

**REMARKS** 

The Applicant wishes to thank the Examiner for thoroughly reviewing and

considering the pending application. The Office Action dated May 17, 2006 has been received

and carefully reviewed. Claims 1, 4, 14 and 18 have been amended and claim 20 has been newly

added. Claims 1-20 are currently pending. Reexamination and reconsideration are respectfully

requested.

The Office Action rejected claims 1 and 3-19 under 35 U.S.C. §102(b) as being

anticipated by U.S. Patent No. 5,823,361 to Babbs (hereinafter "Babbs"). The Applicant

respectfully traverses this rejection.

As required in Chapter 2131 of the M.P.E.P., in order to anticipate a claim under 35

U.S.C. §102, "the reference must teach every element of the claim." The Applicant respectfully

submits that Babbs does not teach every element recited in claims 1 and 3-19. Thus, Babbs

cannot anticipate these claims.

With regard to claims 1, 3 and 7-19, claims 1,14 and 18 have been amended to recite

a cassette device which includes, among other features, "at least two rectangular supporting

bars..." The Applicant submits that Babbs does not disclose this feature. While Babbs does

disclose support rods 128, the Applicant submits that the support rods are not rectangular. On

the contrary, as may be seen in column 6, lines 30-32, the support rod are round. Accordingly,

Babbs does not disclose all the features recited in claim 1 and the Applicant requests that the

rejection be withdrawn. Similarly, claims 3 and 7-13, 15-17, 19 and 20, which variously depend

from independent claims 1, 14 and 18, are allowable for at least the same reasons.

Final Amdt. dated August 17, 2006

Reply to Final Office Action dated May 17, 2006

With regard to claims 4-6, claim 4 has been amended to recite a liquid crystal display

panel supporting cassette device which comprises, among other features, liquid crystal display

panels that include "a first substrate having a plurality of thin film transistor arrays and a second

substrate having a plurality of color filters such that the first and second substrates are bonded

together." The Applicant submits that Babbs does not disclose this feature. Rather, Babbs

discloses a single substrate supported in each slot of the cassette device. Babbs fails to teach or

suggest supporting an entire liquid crystal display panel including first and second substrates

bonded together. Accordingly, claim 4, along with claims 5 and 6, which depend therefrom, are

allowable over the cited reference and the Applicant requests that the rejection be withdrawn.

The Office Action also rejected claim 2 under 35 U.S.C. § 103(a) as being

unpatentable over Babbs in view of U.S. Patent No. 5,236,548 to Stadler et al. (hereinafter

"Stadler"). The Applicant respectfully traverses the rejection.

As required in Chapter 2143.03 of the M.P.E.P., in order to "establish prima facie

obviousness of the claimed invention, all the limitations must be taught or suggested by the prior

art." The Applicant respectfully submits that neither Babbs nor Stadler, either singularly or in

combination, discloses or suggests each and every element recited in claim 2. As detailed above,

Babbs fails to disclose all the features recited in claim 1, the base claim from which claim 2

depends. Moreover, Stadler fails to address the previously noted shortcomings of Babbs.

Therefore, claim 2 is allowable over the cited references and the Applicant requests that the

rejection be withdrawn.

The application is in a condition for allowance and favorable action is respectfully

If for any reason the Examiner believes a conversation with the Applicant's solicited.

representative would facilitate the prosecution of this application, the Examiner is encouraged to
